HILLESHÖG®

A new lion! High performing variety suited for UK conditions

ASLAN, July 2024. VL Uffington, North Walsham & Goliath BYV.

Characteristics

- **ASLAN** is top 3 AdjT% candidate variety (2-y-mean VL trials)
- **ASLAN** has highest AdjT% among year 2 VL varieties 2023
- **ASLAN** has a reliable plant establishment and very low bolting tendency
- **ASLAN** has shown a certain field tolerance to Beet Yellowing Virus (BYV)

Crop yields % of C*

Adjusted tonnes 97.7
 Sugar yield 97.7
 Root yield 97.0
 Sugar content % 16.6

Plant population % of C*

Plant population 100.9
*2-year mean VL-trials '22 & '23

Early sown bolters**

ESB% '23 2.39
 ESB% '22 0.17

**BBRO ESB Total count

Other claims

BBRO Goliath 2023, one of new varieties tested, showing low sugar yield losses for BYV (NOTE: 1-year data, inoculated trial)

VARIETY DESCRIPTION (breeder's info)

DISEASE TOLERANCES

| | | |
|----------------|---|-----------|
| Rhizomania | 9 | Resistant |
| Cercospora | 5 | Medium |
| Powdery Mildew | 5 | Medium |
| Rust | 5 | Medium |

AGR TRAITS

| | | |
|--------------|---|---------------|
| Plant height | 7 | Tall |
| Row coverage | 7 | Covering |
| Harvest time | 7 | Early to late |

BOLTING TOLERANCE

| | | |
|---------|---|----------|
| Bolting | 9 | Tolerant |
|---------|---|----------|
