

HM4302RR

- Strong Disease Type with Good Performance
- Well Balanced Hybrid with Both Good Sugar Quality and Yield
- Excellent Rhizoctonia and Aphanomyces Tolerance
- Impressive Cercospora Tolerance

HM9528RR

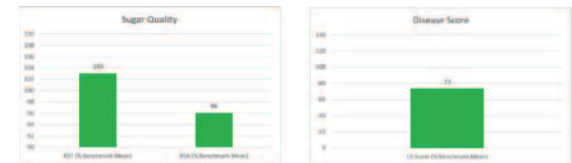

- Proven Performance on Revenue per Acre
- Well Balanced Hybrid with Above Average Sugar Quality and Moderate Disease Tolerance
- Great Aphanomyces Tolerance with Proven Field Performance

2 yr Exp.

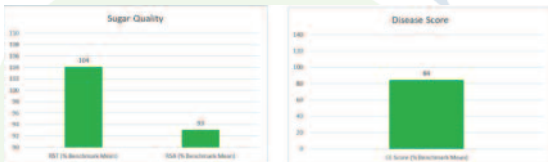

HIL9920 (NEW pending approval)

- High Sugar Quality and Yield
- Moderate Disease Tolerance

HM4448RR

- Proven Field Performance
- Great Revenue per Acre
- Excellent Sugar Content
- Excellent Aphanomyces Tolerance

HIL9708

- Well Balanced Hybrid with Rhizoctonia and Fusarium Tolerance
- Good Sugar Content
- Moderate Rhizoctonia Tolerance
- Moderate Fusarium Tolerance
- Low Tare Beet
